Why Choose ProteinRescue AI

DATA BASED ANALYSIS

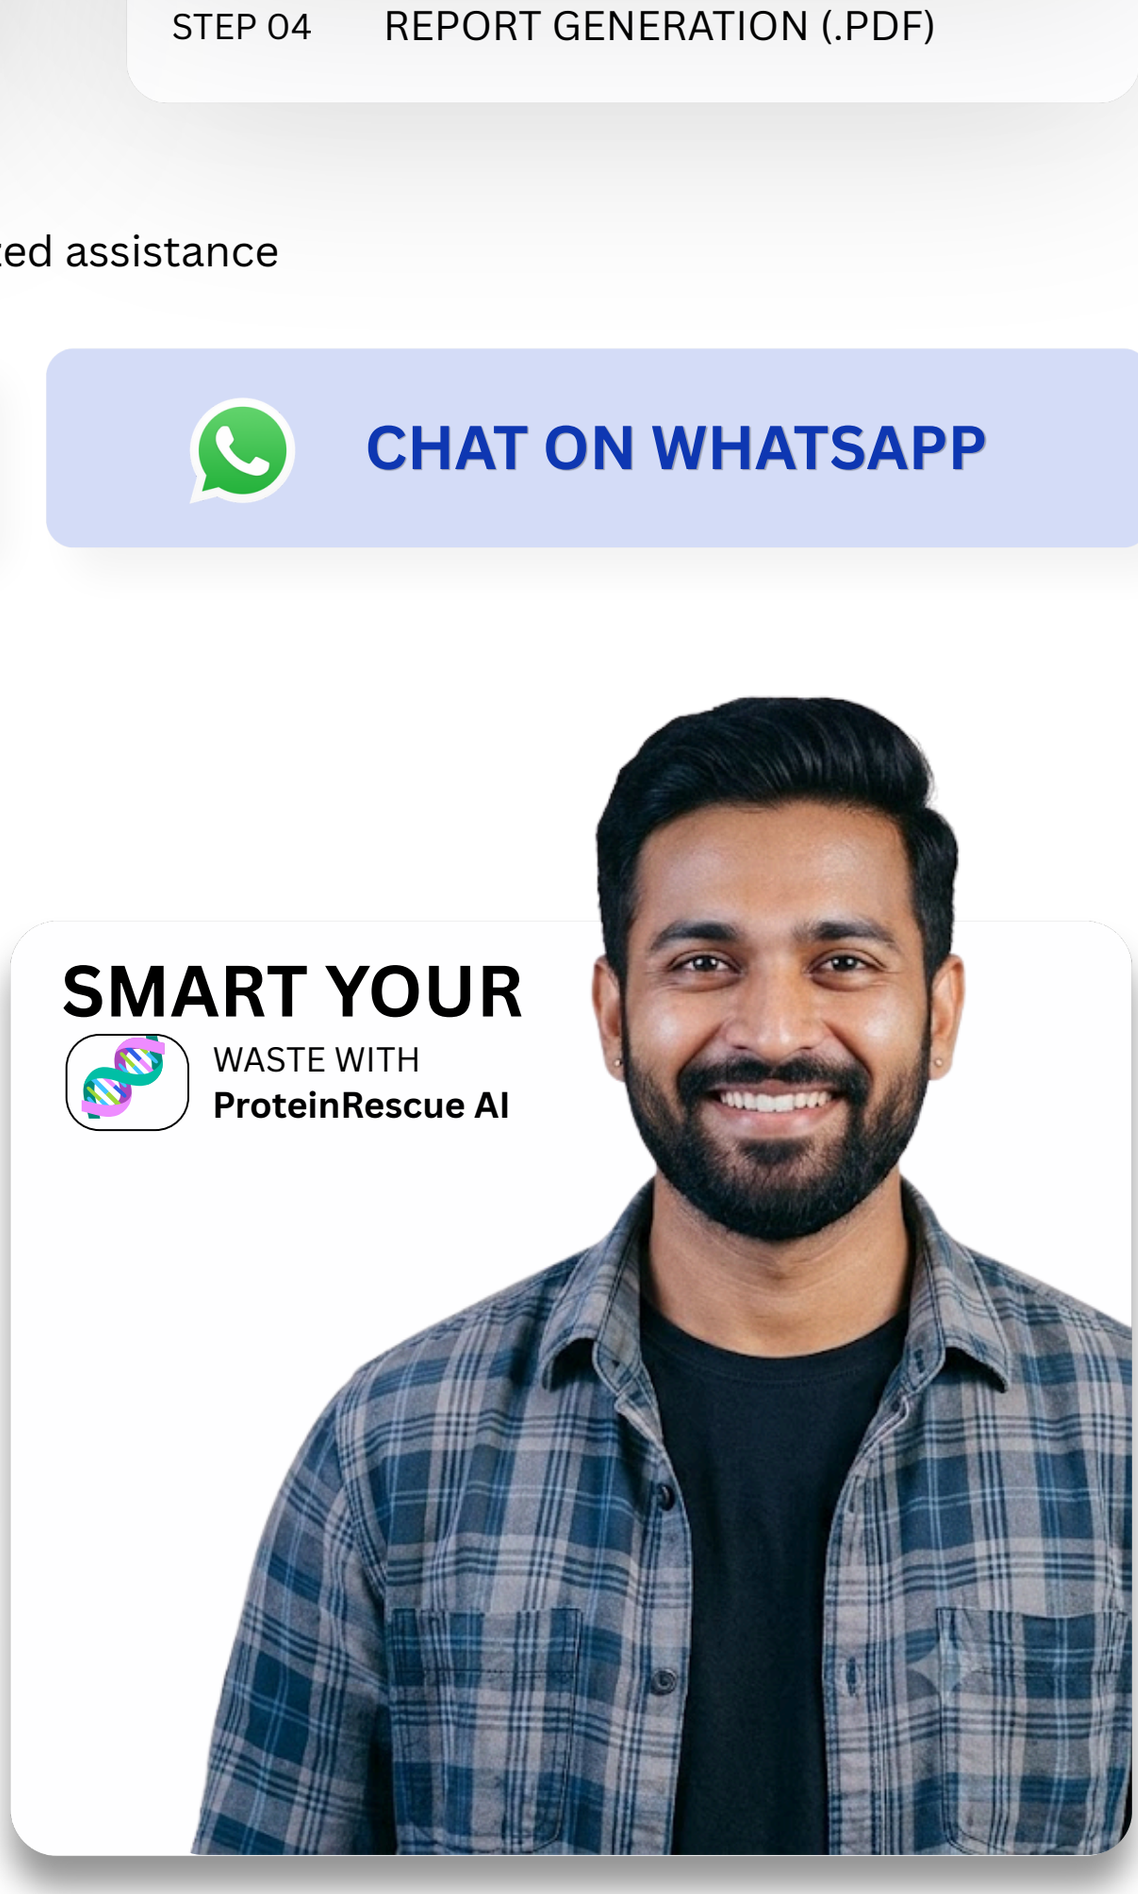

View detailed lab reports on your agro-waste and get instant, accurate insight into its nutrient and protein potential.

TREATMENT SIMULATOR

Simulate upcycling methods (like fermentation or enzymes) to see exactly how to extract the highest value from your waste

COST COMPARISON

Compare upcycling costs against regular disposal to see how much you save and exactly where you can make a profit.

History

View and manage your previous lab reports and AI analysis results.

Search by Report ID, file name, patient name, protein or date...

Safety Check

Check key safety and quality parameters of your by-product before treatment simulation.

Upload Lab Report
PDF, JPG, PNG (Max 10MB)

SSafety Parameters

We analyse the key safety and quality indicators from your lab report.

Based on lab report data

Aflatoxin
Checks if aflatoxin levels are within safe limits.

Protein Content
Analyses protein levels in your sample.

Moisture
Evaluates moisture content for stability.

Phytate
Checks phytate levels (anti-nutrient).

Tannin
Analyses tannin levels (anti-nutrient).

Saponin
Checks saponin levels (anti-nutrient).

Trypsin Inhibitor
Evaluates trypsin inhibitor levels (anti-nutrient).

Heavy Metals
Checks for heavy metals (safety parameter).

Upload a lab report to analyse these safety parameters.
We'll automatically extract the values and show the safety status for each parameter.
